ECOMMERCE MANAGEMANT

By Adarsh tomy and fahad nissam

Electronic Commerce is process of doing business through computer networks. A person sitting on his chair in front of a computer can access all the facilities of the Internet to buy or sell the products.

The main advantage of e-commerce over traditional commerce is the user can browse online shops, compare prices and order merchandise sitting at home on their PC.

The immediate benefits, in terms of cost savings, efficiencies and enhanced profitability are clear at every stage in the supply chain.

The objective of this project is to develop a general-purpose e-commerce store which all types of computer hardware can be bought from the comfort of home through the Internet.

MODULES

Admin panel

A space where admin can manage update or edit the content of the web page
